MOBILE DEV TERM 1 - GEN 11

PROJECT – MILLESTONE 1

- ✓ **Problem**, target users, proposed **solution**
- ✓ **Use cases**, functional **requirements**

Project Name: ExamVault – Cambodian Exam Preparation Library

1. Application Goal and Target Users

Briefly describe the **problem**, who **experiences** it, and how your application will help. Focus on users and their needs, not screens or technical features.

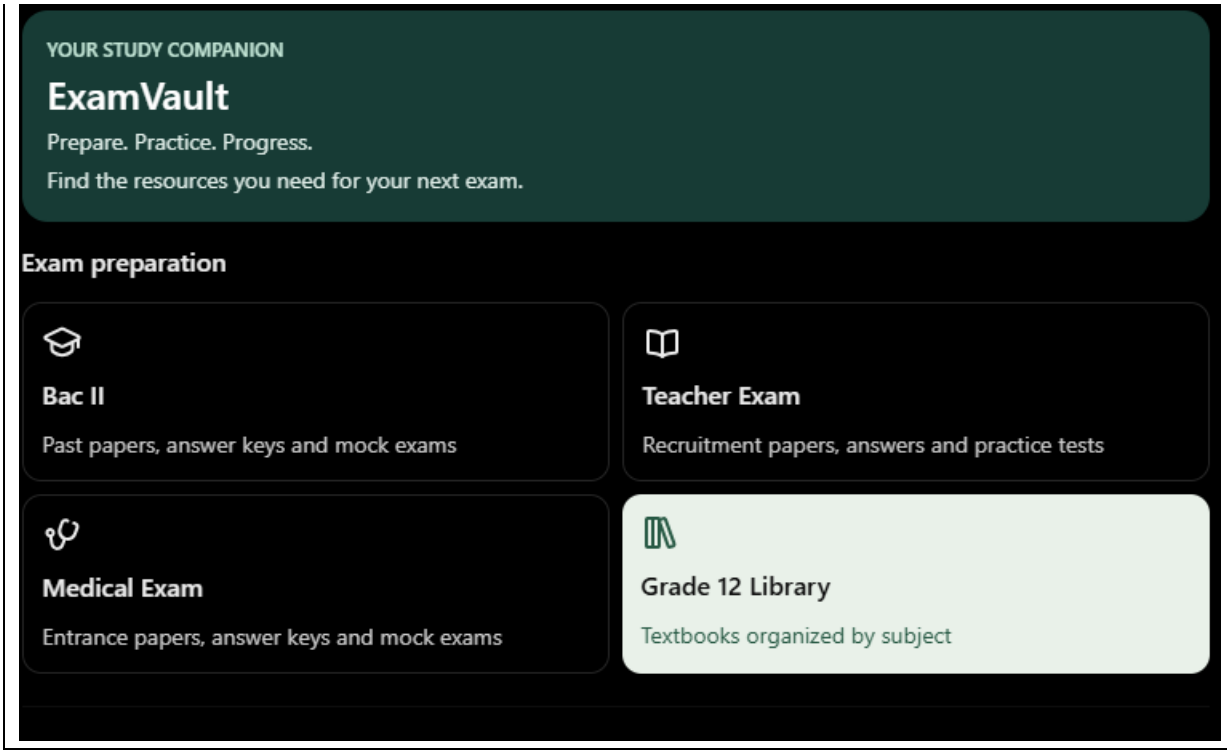

Students in Cambodia preparing for important examinations often struggle to find and organize relevant study materials, such as past examination papers, answer keys, and mock tests. These resources may be scattered across different websites, social media groups, and other sources, making preparation time-consuming. Some practice materials may also require payment, limiting access for students who cannot afford them.

Target Users

Students preparing for medical entrance examinations in Cambodia.
Candidates preparing for teacher recruitment examinations.
Grade 12 students preparing for the Baccalaureate examination (Bac II).

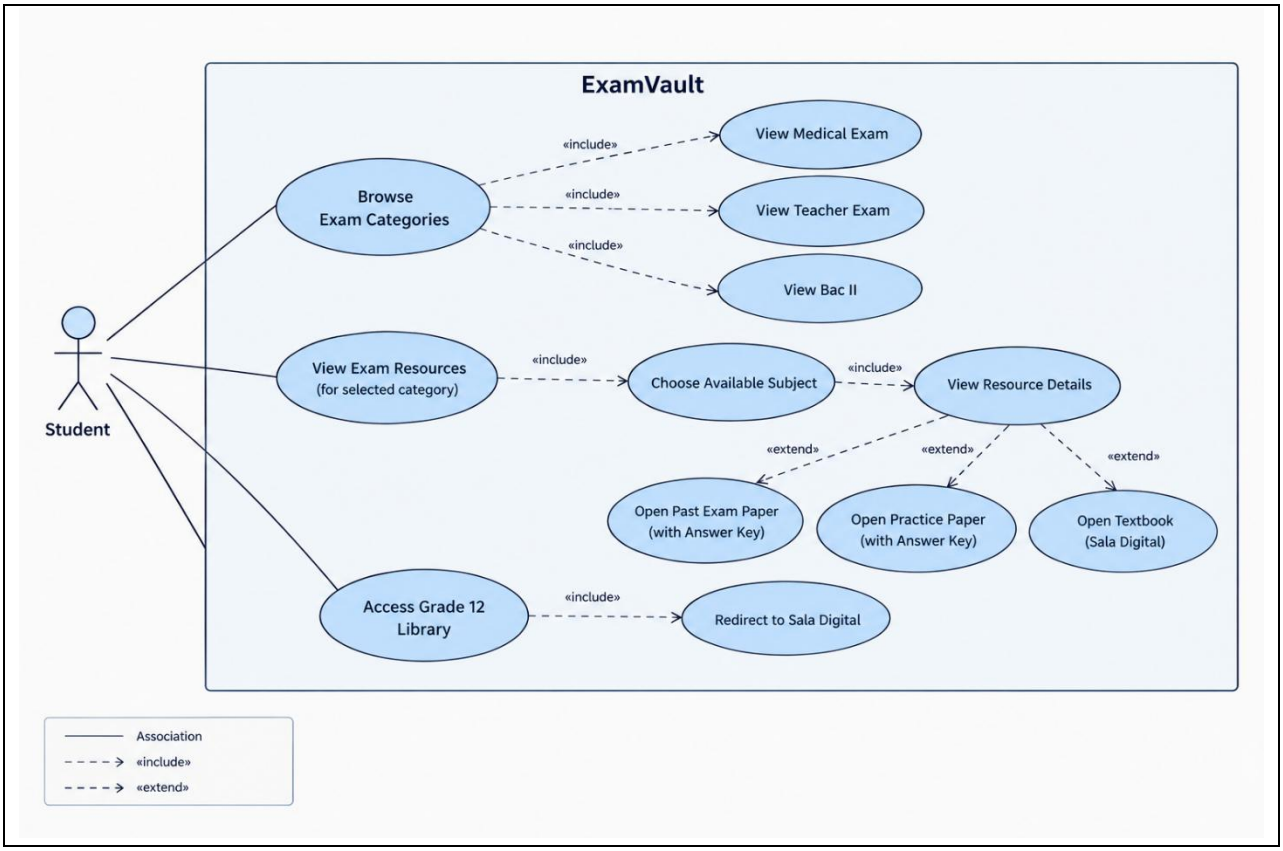

Proposed Solution

ExamVault is a mobile application designed to centralize Cambodian examination preparation resources in one place. It organizes materials into three main categories: Medical Exam, Teacher Exam, and Bac II. Users can browse and search for past examination papers, answer keys, mock tests, and other relevant materials.
The application will also include a separate Grade 12 Library that directs students to textbooks available through Sala Digital.
For the initial implementation, the project will focus on the Medical Exam category by providing a curated collection of available examination papers, answer keys, and practice materials. The other categories will be included in the overall design for future expansion.

2. Functional Scope — UML Use Case Diagram

Draw a **UML-Use case diagram** showing the **main actors** and **what they can do** in your application.

3. User Stories and Acceptance Criteria

Write your main user stories. For each story, define **acceptance criteria** covering normal behavior and relevant edge cases or invalid inputs.

US-1 : `As a [user], I want to [action], so that [goal].`

As a student, I want to browse exam materials by category so that I can find relevant study resources.
Acceptance Criteria:

- *Students can select Medical Exam, Teacher Exam, or Bac II.*
- *Resources are displayed by year or material type where applicable.*
- *A message appears if no resources are available.*

US-1 : `As a [user], I want to [action], so that [goal].`

As a student, I want to search for study materials so that I can find specific exam papers quickly.
Acceptance Criteria:

- *Matching resources appear when a valid keyword is entered.*
- *A message appears if no results match.*
- *An empty search displays the default resource list.*

US-1 : `As a [user], I want to [action], so that [goal].`

As a student, I want to open exam papers, answer keys, and textbooks so that I can prepare for my examination.
Acceptance Criteria:

- *Students can view resource details and open available materials.*
- *Grade 12 textbooks link to Sala Digital.*
- *An error message appears if a resource cannot be accessed.*

💡 Keep your scope realistic for one semester and follow all project constraints !!!
